

NaturClean

ULTRA-ABSORBENT BEDDING CONDITIONER

Recommended for:

- All pig housing
- Dairy cow cubicles and calf pens
- Lambing pens
- Horse stables
- Poultry and game rearing units
- Domestic pet accommodation

Usage Recommendations

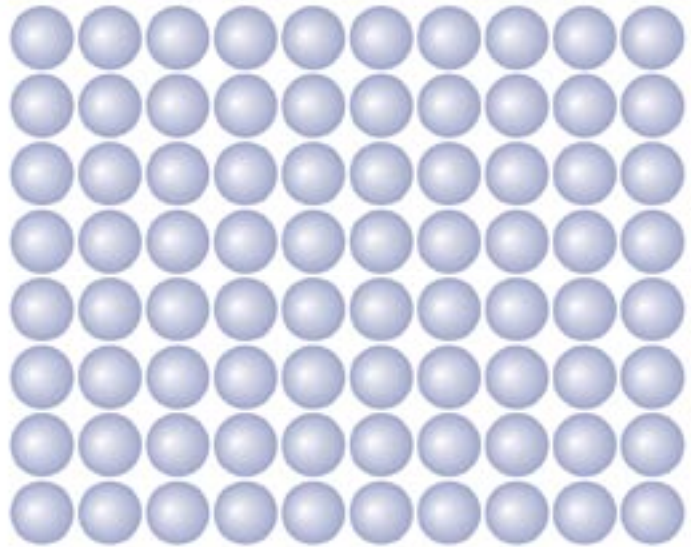

- Sprinkle onto the floor immediately after cleaning or apply directly to the bedding
- An amount suitable to dry up surface moisture should be applied. As a guide approximately 50g (1 handful) should be spread over an area of approximately 1m².

NaturClean

ULTRA-ABSORBENT BEDDING CONDITIONER

NaturClean

ULTRA-ABSORBENT BEDDING CONDITIONER

Why use a bedding conditioner?

Damp bedding provides the ideal conditions for bacteria to grow. A bedding conditioner removes moisture and provides a dry, clean environment for the animal, reducing the risk of bacterial infection. This increases animal comfort and encourages animals to spend more time on their bedding.

What is SCA NaturClean?

- A natural mineral (in powder form) with an exceptional level of absorbency
- A highly effective disinfectant for long lasting protection against a broad spectrum of bacteria, viruses and fungi
- Non-irritant
- Environmentally friendly
- Easy to store
- Extremely convenient and easy to use

What it does...

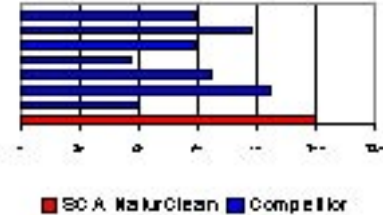

- Absorbs moisture
- Kills bacteria
- Keeps the bedding pH neutral
- Reduces odour
- Gives long lasting protection against a broad spectrum of pathogenic bacteria, viruses and fungi

Which means...

- Animals remain drier, cleaner and more comfortable for longer
- Provides a dry and safe environment
- The threat of disease is reduced
- Manure breakdown is improved
- Housing environments are not corroded
- A safe environment for the operator and all your livestock

Outstanding absorbency with SCA NaturClean

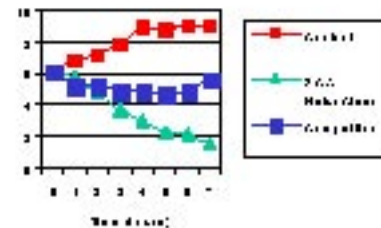

It is well known that the most hostile environment for bacteria is a dry one. Trial comparisons demonstrate the wide range of ability of bedding conditioners to absorb moisture:

The exceptionally large surface area of SCA NaturClean particles (ten times that of lime) means that it absorbs more moisture than alternative products.

The unique disinfectant in SCA NaturClean

SCA NaturClean contains a specially formulated, highly effective disinfectant for longer lasting protection against bacteria.

tion against bacteria.

On-farm and laboratory studies have demonstrated SCA NaturClean's ability to significantly reduce bacterial numbers and other major infectious agents when compared with competitive products.

Non-irritant

SCA NaturClean is a natural buffering material and helps keep the bedding pH neutral. This ensures that the product is not an irritant to delicate tissues, unlike other commonly used materials such as hydrated lime. Furthermore, the neutral pH is beneficial in improving slurry breakdown and reducing odour.
